MISSION PROJECT

Background and Problem
Statement

BACKGROUND

There has been a **shift from theatrical to home entertainment**, led by the growth of online streaming services

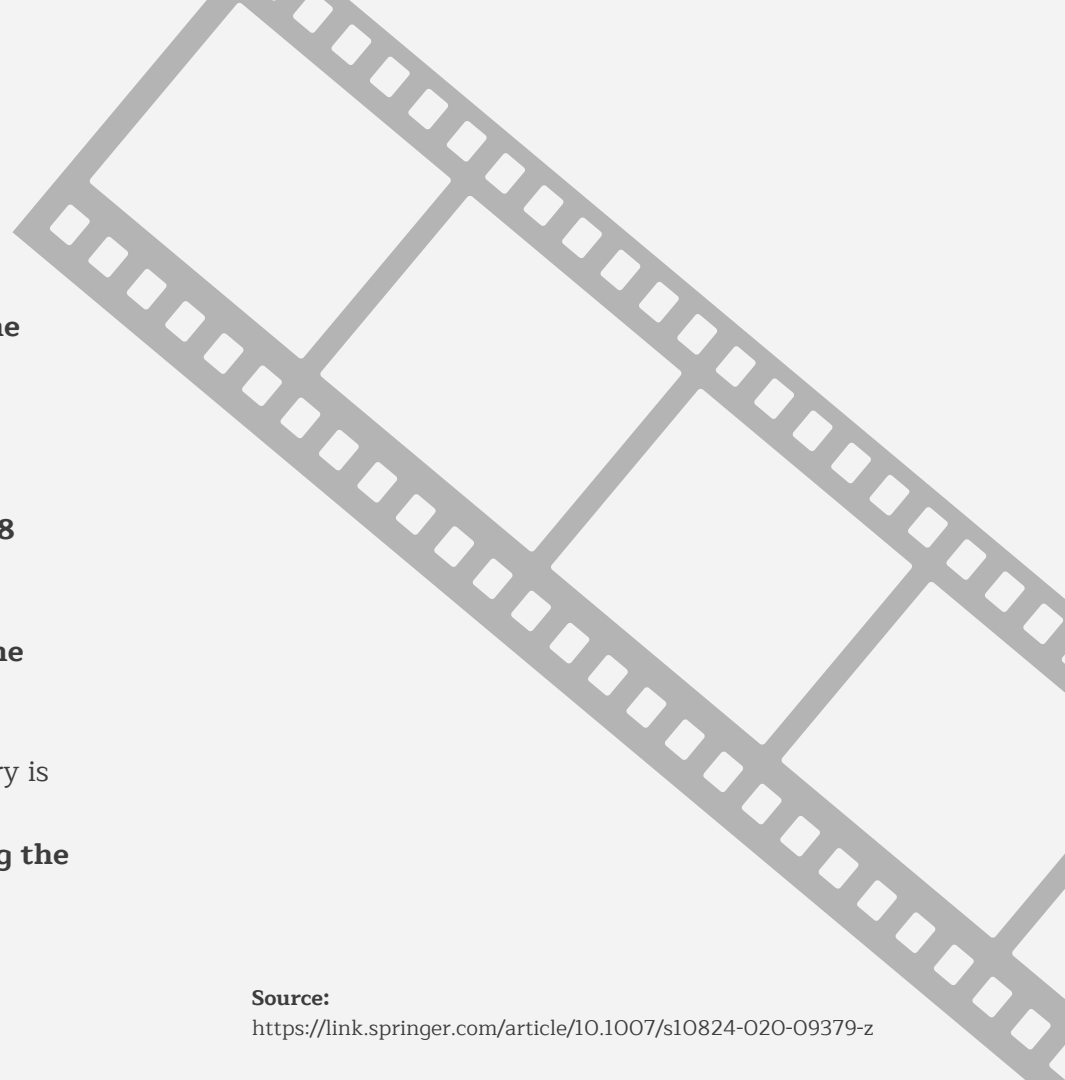

According to an industry report*, the home entertainment market has grown from **USD 15.8 billion in 2014** to **USD 42.6 billion in 2018**

This change has been further **accelerated by the Covid-19 pandemic**

The competition in the online streaming industry is intensifying, with **greater investments from established players and new players entering the market**

PROBLEM STATEMENT

A new online movie streaming service, Binge, is planning to launch operations in Singapore.

As members of its product development team, we have been tasked with **creating a starter movie genre prediction and recommender system.**

Number of Movies Under Each Genre

Label Count

Distribution of Storyline Length

Frequency of 20 Most Common Words

MODELING MADNESS

Modeling and Evaluation

APPROACH

Multi-label Classification

Using **OneVsRest** approach, with union of all genres that are predicted for a movie to be taken as the multi-label output

MODELS - GENRE PREDICTION

K-Nearest Neighbors

Logistic Regression

**Multinomial Naive
Bayes**

PRODUCTION MODEL

***MULTINOMIAL NAIVE BAYES
WITH TFIDF VECTORIZER***

MODEL PERFORMANCE

Genre	Train	Test
Drama	0.81	0.71
Comedy	0.84	0.78
Horror	0.91	0.89
Thriller	0.87	0.83
Romance	0.89	0.86
Action	0.89	0.87
Crime	0.90	0.87
Adventure	0.94	0.91

Genre	Train	Test
Mystery	0.94	0.92
Sci-Fi	0.95	0.94
Music	0.97	0.95
Family	0.97	0.96
Fantasy	0.97	0.95
Western	0.99	0.97
Others	0.91	0.87

EVALUATION

Hamming Loss
0.11

Accuracy Score
0.14

MISCLASSIFICATION

Despite the Falling Snow
(no label)

'moscow communist katya secretly spy american cold war arm race
land big assignment steal secret rise government star alexander last
thing expect fall love reconcile passion belief communism mean
make great sacrifice life sacrifice alexander uncovers thirty year
later'

MISCLASSIFICATION

Dickie Roberts: Former Child Star
(correctly predicted comedy
but also labeled drama)

'top world popular child actor tv hollywood punchline everything
wrong people famous child dickie roberts want find one gig restore
honor everyone love learn rob reiner make ambitious new movie
destine sweep oscar dickie first line audition walk learn certainly
look part act yet owe unusual childhood research role dickie embark
bizarre scheme live suburban family see average american child life
put son glove dickie discovers great part true family whether get
part attempt method act certainly change life forever'

LIMITATIONS AND NEXT STEPS

In using the OneVsRest classifier for training our model, we ignore any correlation between genres in movies with multiple labels

In addition, labels are predicted based purely on the unique genres found within the IMDB dataset. Further iterations of the model maybe required to train for new genres.

MODELS - RECOMMENDER SYSTEM

**Storyline-based
Recommender**

**Genre and
Description-based
Recommender**

EVALUATION

Storyline - Shrek

Shrek 2

Shrek Retold

Shrek Forever After

Shrek the Third

Shrek the Musical

Description and Genre - Shrek

Shrek Retold

One More Time

The Lorax

Snow White and the
Seven Dwarfs

Fairy Tales

LIMITATIONS AND NEXT STEPS

The models developed are based on the **exhaustive list of English movies** within the IMDB dataset

The systems are purely **content-based** as the Binge platform is currently under development

Binge can look into developing collaborative recommender systems that can provide recommendations based on user profiles

THE FINALE

Conclusion

CONCLUSION

New content is being generated everyday

The genre prediction and recommender systems provide a good starting point for Binge to **optimize internal operations and engage users**

Once Binge rolls out its services, it can collect **user feedback and undertake A/B testing** to improve its content classification and recommendation capabilities

An illustration of a vintage car, possibly a Ford Mustang, in a dark brown color. The car is shown from a side profile, facing right. A bright spotlight beam originates from the front of the car and extends diagonally upwards and to the right, illuminating the text area. Several yellow, four-pointed starburst shapes are scattered along the path of the spotlight beam. The background is a light gray gradient.
